DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on November 12, 2003 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

2. Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted in light of the specification, the prior art of record fails to specifically show a radiation sensing apparatus and method comprising an image sensing unit capable of nondestructive reading and includes a plurality of pixel portions for sensing and object by passing radiation from a source through an object, a drive circuit which drives an image sensing unit so that a first signal which is obtained by resetting the plurality of pixel portions is read out nondestructively from the image sensing unit, a differential circuit which effects differential operation of the first and second signal, and a control circuit which effects control to stop emission of radiation from the source on the basis of nondestructive signal read out from the image sensing unit. While Spivey (U.S. 5,528,043) and Yabe (U.S. 4,803,550) references appear to provide motivation for such a combination with that of Applicant's Admitted Prior Art, the primary reason for allowance is that the prior art of record fails to disclose the

nondestructive capabilities within the image sensing unit to the drive and differential circuits as suggested by the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
